## **Your Connection Information**

# CS-10 Installation for Mac

# Installing the Nokia CS-10 on MacOS X 10.5

Nokia's Internet Modem supports both Windows (XP SP2 or later) and MacOS (10.4 or later), providing connection speeds of up to 7.2Mbps (download, 2.1Mbps upload)

Detailed specification information can be found on the Nokia web site here: http://europe.nokia.com/find-products/accessories/all-accessories/ home-and-office/imaging/nokia-internet-stick-cs-10/specifications

Insert the Nokia device into an available USB port on the Mac. The device will be recognised as a CD and an icon will be displayed on the Desktop (or in the Finder):

Double click the icon, the following package will be available:

**Double click** the package to launch the installation wizard, the following window will be displayed: Click Continue.

Click Restart once Install is successful.

**Once rebooted**, open the Applications folder, a new folder for 'NOKIA' will have been created containing the Connection Manager. An icon will also have been added to the Dock:

Launch the application. When run for the first time, the following window will be displayed. Select the CS-10 and click Continue:

The software will determine the correct connection settings to use based on the SIM inserted into the CS-10. If multiple connections are available, select the one appropriate to your account with the operator and click Continue:
